

Fanless MINI PC JFTCK620M

MINI PC JFTCK620M adopts **dual core dual-threads** Intel Celeron J1800, 2.41-2.58GHZ graphic card speed,it has strong office processing performance, low consumption, high performance, adopting the silver aluminum alloy chassis which looks very professional and high-end. Firm and shakeproof enough. JFTCK620M, it's your best choice for both working and entertainment .

Intel Celeron J1800

Dual Core Double Threads 2.41-2.58Ghz

Intel Celeron J1800
Dual Core Double Threads 2.41-2.58Ghz

Exquisite Fanless Design

Extremely Smooth Operating Speed

Main Features:

1. Tiny Little Size & Exquisite Design

JFTCK620M features very **mini size** which can save a lot space. It is **fan-less design** so it will not have any noise. Its light weight makes it convenient to move, it is wall-mounted or put it on the desk, it looks elegant.

2. Dual Display

It can be used as an independent computer, there are VGA and HDMI ports which can support dual screen and dual display.

3. Cost-effective

This mini pc can save up to 80% total cost of owner compared with buying a traditional desktop PC , embedded low power consumption CPU can cut down the electricity costs.

4. Stable and Durable

JFTCK620M uses highly centralized technology design, delicate kensington lock anti-theft design makes it more safe, it is hard to move which can reduce the rate of stealing , low power consumption and less heat dissipation, it has a long duration for usage.

Specification

Model	JFTCK620M				
Consumption	10W	Weight	1KG	Warranty	3 years
Shell	Silver Aluminum Alloy				
WIFI	Optional Internal	Power	12V-3A	Machine size	14*14*2 CM
CPU Overview					
CPU type	Intel Celeron J1800 dual-core 2.41--2.58GHz processor				
Core/thread	Dual-Core double threads				
CPU cache	Second level cache:1MB				
Graphics	Integrated graphics. Intel HD Graphics				
RAM	Default: 2GB DDR3 RAM. (4GB/8GB extendable)				
Storage	Default: SSD 16GB. (SSD 32GB/64GB/128GB extendable)				
Network	Onboard Realtek RTL8111E 1000Mbps self-adaptive				
I/O Port	HDMI,VGA,USB2.0*3,USB3.0*1,RJ45 Lan port, DC 12V Port MIC,SPK				
Support OS	Can embedded Windows 7/ Windows 8/ Linux OS				

Application Area

MINI PC JFTCK620M owns abundant application.

Simply said,mini PC JFTCK620M can be regarded as a host with super performance.It can install all Windows OS or Linux OS. JFTCK620M can do what a Normal PC can do,with high efficiency at a least cost.

1. Home PC,Normal Computer, HTPC,the mini pc comes with HDMI ports which could directly connect to the TV,user could not only enjoy the super HD 1080P movie,searching the Internet,playing games,browsing the latest news,listening to the music but also shopping online and chatting etc.

2. Cyber Cafe PC, high-speed Gigabit Ethernet and the powerful graphic card makes it perfect for Cyber Cafe,a smart mini pc with freezing cost.

3. Business Office PC, fast and stable to operate Microsoft Office,browser etc,it is the perfect choice for office user!

4. Educational Computers,School PC,it has the better performance than cloud terminal,high software compatibility,better color bit,faster operating speed,ultra low consumption 10W,very smart size makes it more suitable for educational users.

5.More Application,such as Call Center,Bank,Hotel Rooms,Meeting Room,Hospital,Language Lab,Factory,Government,Hotel etc.
